JOY BREAUX N5YCS - SILENT KEY

It is with great sadness that the Amateur Radio World and the Acadiana Amateur Radio Association, Inc. (AARA) loses another member. On the evening of February 7, 2020, Joy Breaux N5YCS passed away after being on life support for a while. Her wishes were that her body to be donated to science, no obituaries, or funeral announcements to be published.

A little about Joy for those who or who did not know her. Joy was a long time member of the AARA and served as past treasurer for 12 years. Joy and Rick shared in being "backyard bird watchers" among other hobbies such as traveling, attending hamfests, especially the AARA hamfest where you could usually find her at the front door at the registration desk. Joy and Rick also participated in many special event activities. Joy & Rick were long time members of the QCWA Chapter 109 in Baton Rouge.

I am sure all that knew Joy will miss the beautiful smile and kind words she had for everyone.

Our prayers go out for the Breaux family.

Sandy LeBlanc KE5KJF (L.) and Joy Breaux N5YCS (R.)

Randy Rushing KG5KFI - Silent Key

Thanks to Greg Dolan II - K5LFT, it was just noted that Randy Rushing KG5KFI, age 53 of Breaux Bridge, became a Silent Key on January 7, 2020.

Randy was a proud United States Veteran. He served honorably in the U.S. Army, and was a member of the American Legion Post #69, Blind Veterans Association, Veterans of Foreign Wars, Disabled American Veterans, and the Acadiana Honor Guard. He was also a Amateur Radio Operator (KG5KFI) and a member of the Acadiana Amateur Association, Inc. in 2016.

Obituary: <https://www.waltersfh.com/obituary/Randy-Rushing>

YOTA Camp 2020 in the Americas Donations Are Being Matched

Youth on the Air (YOTA) 2020 Camp Director Neil Rapp, WB9VPG, has announced that, thanks to a generous radio amateur, a matching fund drive is in progress through the end of February to help fund the 2020 YOTA Camp, June 21 - 26 at the National Voice of America Museum of Broadcasting in West Chester, Ohio.

"From now until the end of February, every dollar donated to the Youth on the Air Camp will be matched by Steve McGrane, KM9G, up to a total of \$4,000," Rapp said. "Your donations in support of this unique opportunity for youth to share ham radio with their peers will count double until the end of February."

Donations may be made via PayPal, GoFundMe, or a check. Rapp said donations could make it possible to increase the number of campers from 20 to 30 to better meet demand.

"Our corporate and foundation sponsors have raised most of the funds, but we need clubs and individuals to finish the job," he explained.

Rapp is an alumnus of the ARRL Teachers Institute on Wireless Technology TI-1 and TI-2 courses.

Some members failed to put their birthdays on their applications for renewal / membership causing names to be missing from the list.

Don't forget to renew your membership by January 31st.

US Marines with Information Group II Marine Expeditionary Force (II MIG) participated in an amateur radio general licensing course. The course was conducted on base January 27 - 31 as part of the group's High Frequency Auxiliary Initiative. Members of the Brightleaf Amateur Radio Club of Greenville, North Carolina, helped the Marines in the class learn the principles of HF radio operations as a contingency against a peer-to-peer adversary in real-world operations. During the course, Marines learned ham radio theory, band allocations, conventional and field-expedient antenna theory, and general ham radio operation and control. II MIG Commanding Officer Colonel Jordan Walzer created the High Frequency Auxiliary Initiative after recognizing the need for additional options in combat environments. "Right now, our adversaries are aggressively pursuing counter-space weapons to target our satellites and ground stations," Walzer is quoted in the article. "If our satellites get knocked out, what do we do then? [High frequency] radio has been around for well over a century and is still used today. Why? Because it's a reliable, low-cost alternative to satellite communications. With the right training and education, a Marine with a radio and some slash wire can communicate over-the-horizon for long distances, even between continents.

A working scale model of an HF curtain array antenna is on display at the National Voice of America (VOA) Museum of Broadcasting in West Chester, Ohio. The model, which operates on 70 centimeters, is a 4×2 design with a screen reflector, and is the same style of antenna the VOA Bethany Relay Station used until its final transmission in November 1994. West Chester Amateur Radio Association (WC8VOA) members Richard Kreuter, WC8RK, and Joe Burke, WA8OGS, designed and constructed this curtain array. EZNEC Pro 4 models indicates the antenna has a gain of 21.35 dBi at 8° at a half-wavelength above ground. The club thanked Roy Lewallen, W7EL, for modeling the array. The museum and WC8VOA will be open for extended hours during Dayton Hamvention® for those interested in seeing the model.

UPCOMING EVENTS

AARA Hamfest

March 13-14, 2020 Rayne, LA

Field Day

June 27-28, 2020 TBD

For any additional information, check the W5DDL.org website

SPANISH RICE

2 Tbs Olive Oil
1 Garlic, minced
3-1/4 Cup Chicken Broth
1/2 tsp Oregano

1 Onion, finely chopped
2 Cups long-grain Rice
1 Cup diced Tomato, drained
1 tsp Salt

Heat olive oil in large skillet on medium/high heat. Add the rice and stir it so that the rice coats with the oil. Cook, stirring often, until much of the rice has browned.

Add the onion and cook, stirring frequently another 3 minutes, until the onions begin to soften. Add the garlic and cook until the onions are translucent and softened, about a minute more.

Combine broth, tomato, oregano, salt, and browned rice with onions and garlic. Bring to a boil

Cover; reduce heat to a low simmer. Cook for 20-30 minutes, depending on the type of rice and the instructions on the rice package. Remove from heat for 5 minutes. Fluff with a fork to serve.
